BLUEBIRD RECOVERY PROGRAM

October 28, 2001

Dear Bluebirders,

The 2001 Directory contains data from 354 reports.

Minnesotans sent in 287 reports. Minnesota totals were:

6,765 nestboxes
2,301 successful broods
12,056 eggs
9,867 hatched bluebirds
9,039 fledged bluebirds

BBRP members from **outside Minnesota** sent in 67 reports:

2,136 nestboxes
1,447 successful broods
7,736 eggs
6,273 hatched bluebirds
5,865 fledged bluebirds

Adding these last figures to those of Minnesota yields a total of 354 reports:

8,901 nestboxes
3,748 successful broods
19,792 eggs
16,140 hatched bluebirds
14,904 fledged bluebirds

Minnesotans fledged an average of 3.93 per successful brood, slightly down from last year (4.06). Outstate reporters fledged 4.05/successful brood, down from 4.20 in 2000.

Minnesota is indeed the land of 10,000+ lakes, resulting in tree swallows competing with bluebirds for nestboxes in most locations. Thus 95% of Minnesota nestboxes are paired to accommodate both. Most out-of-state reporters do not pair boxes. This should be taken into account when comparing 1.34 bluebirds fledged per Minnesota box to 2.74/box elsewhere.

Intense cold and rain in early spring, followed by prolonged high temperatures in early summer was the complaint in many states, including Minnesota. With few exceptions, tree swallow populations seemed to be down again in Minnesota, perhaps part of a purported 10-year cycle. House sparrow predations again are most often cited, though significantly lower on trails where they have been trapped over several years. Trails where house wren's dummy sticks were removed in 2000 had significantly less wren destruction.

Notations on the data sheets: Because the computer program accepts only numbers in certain columns, where blanks, question marks or + signs had been entered, we had to insert "educated guesses".

Thanks to all who reported, Dick Eide for checking figures, and Jan Ahlgren for supplying the county maps and charts. Any errors should be reported to Dorene Scriven.

This directory is for exclusive use of BBRP members, to contact other members when in need of help. It is NOT to be used for any solicitation purposes.

indicates that in four boxes, there were no successful broods. Though 4 eggs were laid twice, no eggs hatched, none fledged (raccoons probably got both sets of eggs.)
